SUMMARY

Computer Science undergraduate at Queens College (CUNY), graduating Spring 2027, with hands-on experience building AI-powered systems, data pipelines, and working prototypes. Strong background in Python, NLP, LLM-based applications, and experimental evaluation, with experience translating AI concepts into practical, scalable solutions. Passionate about applied multimodal AI and rapid prototyping in real-world environments.

EXPERIENCE

Metropolitan Transportation Authority (MTA)

October 2025 - Present

Staff Analyst Intern, Procurement – Vendor Relations Unit

Queens, New York, USA

- Evaluated and managed procurement projects exceeding \$5 million within the Vendor Relations Unit, ensuring compliance, data accuracy, and performance tracking across contracts.
- Audited and reconciled vendor records using SQL, Microsoft Access, and Excel, while collaborating with project managers to review evaluations, resolve discrepancies, and improve communication.
- Developed automated Power BI dashboards and streamlined data workflows to deliver key vendor insights, enhance reporting efficiency, and support executive decision-making.

Department of Education

September 2024 - October 2025

IT Intern

Queens, New York, USA

- Diagnosed and resolved hardware, software, and network issues in a high-volume production environment, improving system reliability by 25%.
- Performed root-cause analysis on recurring failures and documented fixes to prevent regressions.
- Supported mission-critical classroom systems, prioritizing incidents under time constraints while maintaining operational uptime.

Loisaida Inc

July 2024 - June 2025

Software Engineering Intern

Manhattan, New York, USA

- Designed and deployed Python-based data ingestion and processing systems to collect metrics from 20+ distributed IoT sensors.
- Debugged and optimized offline/online data synchronization logic, improving data integrity by 20%.
- Built reusable modules for data validation, aggregation, and visualization, supporting system monitoring and reporting.
- Collaborated with cross-functional teams to translate requirements into scalable technical solutions.

Shttle

July 2023 - January 2024

Business Analyst Intern

Riyadh, Kingdom of Saudi Arabia

- Closed high-profile partnerships by delivering strategic pitch decks, securing deals with Public Investment Fund (\$930B) and Saudi Arabia's Ministry of Tourism, expanding Shttle's market reach.
- Grew Shttle's network and visibility by representing at key events, securing 3 new partnerships, and improving logistics and decision-making to boost operational efficiency.

Zero Call by Nawafith

September 2023 - January 2024

Product Manager/CoFounder

Riyadh, Kingdom of Saudi Arabia

- Led development of an MVP using Agile methodologies, collaborating with engineers on system design and feature implementation.
- Defined technical requirements, prioritized backlogs, and shipped features achieving a 20% faster time-to-market.

PROJECTS

- Built an AI-powered customer intelligence platform analyzing 4,439+ Chewy YouTube comments using Hugging Face, BERTopic, Gemini, and CrewAI to generate customer insights and business recommendations. [Github](#)
- Developed an NLP-based sentiment analysis system for Nike using CrewAI, GPT, and spaCy to automate data scraping, perform emotion and aspect-based analysis, and visualize insights in Power BI. [Github](#)
- Analyzed 1,000+ NYC 311 noise complaints using Python, pandas, and the Open Data API, visualizing borough-level patterns and peak noise hours with matplotlib and seaborn. [Github](#)

SKILLS + LANGUAGES

Programming & Data: Visual Basic, Python, C++, C#, SQL, spaCy, Hugging Face (exposure), CrewAI, OpenAI APIs

Tools: CrewAI, Ollama, Local LLM Hosting, API Development, Data Pipelines, Debugging, Data Validation

Development Practices: Agile, OOP, Data Structures, Debugging, CI/CD, API, LLM Applications, Machine Learning
